$\boxed{223} - 84 = 139$

Free Printable Math Worksheets:
SUBTRACTION with regrouping
3 digits – 2 digits

1st Case Examples :

$$*534 - 58 = \underline{400+120+14} - \underline{50-8} = 400 + \underline{120-50} + \underline{12-8} =$$

$$= 400 + 70 + 3 = 473$$

$$*534 = \overset{500}{\underline{400+100}} + \overset{30}{\underline{20+10}} + \overset{4}{\underline{4}} = 400 + \underline{100+20} + \underline{10+4} = 400 + 120 + 14$$

2nd Case Examples :

$$653 - \boxed{?} = 576 \quad \text{which means:} \quad \boxed{?} = \overset{500+140+13}{**653} - 576 = \mathbf{77}$$

$$**653 = \overset{600}{\underline{500+100}} + \overset{50}{\underline{40+10}} + \overset{3}{\underline{3}} = 500 + 140 + 13$$

Or we can try going down in **chunks** to our solution:

- first we take away "**53**" from "**653**" to get to "**600**" (round number)
- then another "**20**" to get to "**580**"
- then finally "**4**" more to get to "**576**"
- so that's: **53+20+4 = 77**

3rd Case Examples :

$$\boxed{?} - 52 = 289 \quad \text{which means:} \quad \boxed{?} = \overset{200+80+9}{289} + \overset{50+2}{52} = \mathbf{341}$$

or if we elaborate:

$$\underline{200+80+9} + \underline{50+2} = 200 + \underline{80+50} + \underline{9+2} = 200 + 130 + 11 = 330 + 11 = 341$$

$$\boxed{?} - 88 = 647 \quad \text{which means:} \quad \boxed{?} = \overset{600+40+7}{647} + \overset{80+8}{88} = \mathbf{735}$$
